# APU®

PLASTER JOINT PROFILES FOR INTERIOR AND EXTERIOR PLASTERING

## Corner bead

# DUO

For thick-level plasters

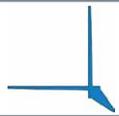

The **APU corner bead DUO** is used in interior and exterior plaster systems for forming a flush, exact plaster edge.

The profile has a reinforced edge in the corner area. The plaster bars have holes and are suited to a thick-layer system.

A22

## Fitting

- ① Using trimming shears with supporting surface, cut corner bracket to the desired size.
- ② Fully embed the corner bracket with bonding mortar, creating a flush finish.
- ③ Apply a covering layer of plaster.
