

Profiles for interior and exterior plastering

A16

APU Telesopic Fillet UNIVERSAL

plaster joint to large-sized window and door systems up to 10 m²

The telesopic fillet UNIVERSAL is intended for plaster joints where interior or exterior bigger movements are expected. The fillet is horizontally and vertically flexible as one profile part is inserted into the other.

The profile is driving rain proof and quickly returns to initial position during strong wind/suction loads. A thick self-adhesive PE Sealing Tape ensures permanent sealing. The self-adhesive Protective Tab holds the on-site protective foil during plastering/painting work.

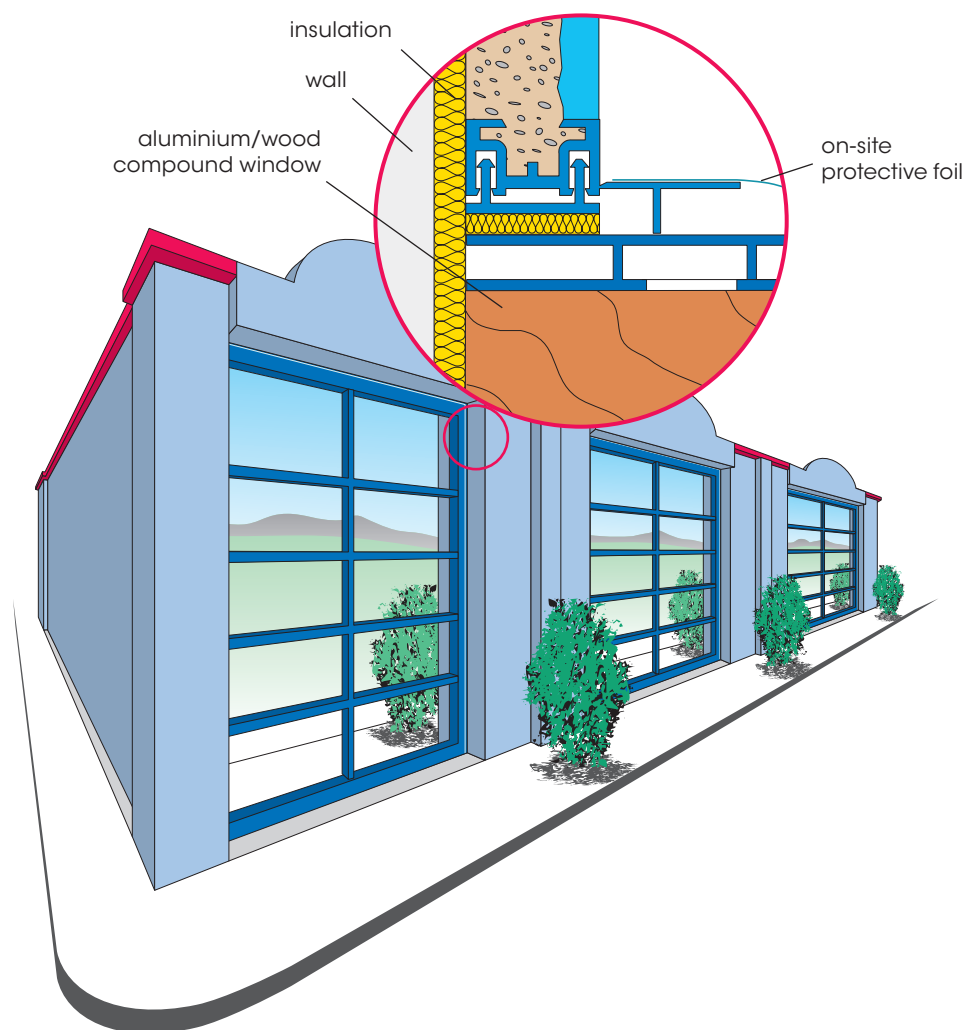

Resistant to driving rain as per test certification EMPA No. 166 730/1.

Available packed unit:

50 bars of 2.40 m = 120.00 m

For detailed information see technical information sheet or visit us on the Internet at www.apu.ch. The most up-to-date APU-selection criteria are to be adhered to.
