APU Corner Bracket with fabric **ULTRA-TEX** with plaster level bars

A new generation Corner Bracket made of plastic, with large elongated perforations facilitating convenient passage for coating material. Each two smooth ultrasonically welded plaster level bars on both halves of the bracket support uniform secure application of the coating. At the same time, these bars protect the glass-fiber fabric in the angular area during processing and prevent mechanical damage to the fabric coating.

**Available packed unit:**  
50 bars of 2.00 m = 100.00 m
